**SUMMARY OF THE INVENTION**

Amend [0004] as follows:

~~The~~ An object of the present invention is, therefore, to propose a twin-clutch system for which the mechanical loading capacity of the clutch cover will be increased, in particular.

Amend [0005] as follows:

~~This objective is achieved in accordance with the~~ The present invention provides by a twin-clutch system for a transmission, in particular for a twin-clutch transmission, having at least two clutches, each of which has a clutch cover, to which at least one clutch-release system for actuating the clutches is attached, a fastening member for coupling the two clutch covers being provided. In this manner, the clutch covers of the twin-clutch system are fastened to one another, thereby altogether enhancing the rigidity or loading capacity.
